

KEDRON OWNERS GROUP INC.

Public Liability Summary

A summary of Public Liability Insurance

Public Liability Insurance covers the group if it is required to pay compensation and legal costs for a claim made against the group for personal injury or property damage (or both). This type of insurance provides coverage in circumstances where the group is found to be legally liable.

Generally, the injury or damage must occur on the premises occupied by the group or while the group was meant to be exercising a supervisory role. It is strongly recommended that an organisation that has premises or arranges excursions should have adequate public liability insurance to cover it against being sued for negligence.
